States, Markets, Families

Gender, Liberalism and Social Policy in Australia, Canada, Great Britain and the United States

Julia S. O'Connor, Ann Shola Orloff and Sheila Shaver

Three leading figures in the field make this important contribution to debates about social policy and gender relations in an era of economic restructuring and market liberalism. Structured thematically and systematically comparative, the book analyses three key policy areas: labor markets, income maintenance and reproductive rights. It explores the question of whether liberal states should intervene in workplaces or families to guarantee the rights and welfare of all individuals within them.

Making Race and Nation

A Comparison of the United States, South Africa, and Brazil

Anthony W. Marx

Ideas, policies, conflicts about race and images of nationalism have been major themes of politics for more than a century. This book illuminates the particular experiences of South Africa, the United States, and Brazil, but also uses comparisons to reveal patterns and linkages between race, nation, state and class dynamics not otherwise apparent.

The Embeddedness of Institutions

THE JOURNAL OF WOMEN'S HISTORY

If you're not already subscribing to
Social Politics, here's what you're missing...

Scholars in many disciplines are concerned with the profoundly gendered implications of politics and state development. Using diverse methodologies, researchers examine the role of states in constructing and organizing sexualities and gender relations in families, workplaces and polities, and exploring the gender dimensions of citizenship and social policy across the world. These and related issues constitute the field of study – and the journal – *Social Politics*.
